FLEXOR xCUT cut-to-register finishing system

VIPColor Colour Label Printers VP700 and VP750 are becoming increasingly prominent due to their blazing **speed, printing quality and cost-effectiveness**. Combined with FLEXOR xCUT is our response to the development of the digital roll to roll label print industry on **250mm width**.

The powerful S-drives positions the cutting plate using a servo motor and executes the kisscutting with remarkable precision. Typical problems with waterproofing can be eliminated by applying the lamination, it also allows for convenient operation with large roll media.

High Accuracy Registration:

- Precise Semi Rotary die cutting with the highest die cutting accuracy, up to +/- 0,15mm

Accurate tension control :

- Automatic and safe slow down and start up for any label length

Cut & Laminate printed labels

Now your digital printed job can look really professional. **Laminate, die cutting, waste remove and slitting in only one pass.**

Super intelligent sensors guarantee **extreme cutting precision**, and recognizes the gap between printed labels or black marks.

All blank labels - one cylinder

All you need is one flexible blade to save your time and money. You can cut labels that are **up to 406,4 mm in length***.

Change the magnetic blades/die in just a few seconds!!

Specifications:

- Semi-Rotary (cut-to-register) and Full-Rotary. Included one non-changeable magnetic cylinder Z-128
- Max. rolls diameter size: 450mm (almost 1000 linear meters).
- Max. speed: 24m/min cut-to-register (semi-rotary), 18m/min cut-to-register (in-line with VP7xx printer), and 30m/min on full-rotary.
- Lamination module for supported and unsupported laminates.
- Razor knife slitting.
- Control Panel.
- Positioning system by black mark sensor.
- 76mm shafts. Optional exchangeable pneumatic shafts 76mm, 50mm, 40mm.
- Power Supply: 4 KW, 220 V ac, monophasic.
